Business Check Experts

Committed to your security and satisfaction

Security Solutions

Ensure your checks and other important documents are of high quality with proven protection. Look for products that are trusted to be delivered safely—on time and on budget.

Check fraud is a battle everyone faces. Arm yourself with the best products. All of our checks are printed on quality Security Papers. We feature both on-paper and in-paper features to make your checks secure.

We proudly offer products that provide the perfect level of protection you require. See **pages 64-65** for our secure features. Our knowledgeable customer service team can help you select the products to fit your needs.

Our Commitment to You

Your satisfaction is guaranteed. If we don't do it right, we'll make it right. The colors of products shown in print and on the website are approximations. If you are unsatisfied with our product or service, contact us so we may correct it.

Check Security Features

Add-on-paper security solutions

Padlock Icon

Indicates a minimum of three security features on checks and is a registered trademark of the Check Payment Systems Association (CPSA).

Micro-Printing

Printed text that is too small for the human eye to read acts as an anti-counterfeiting measure. Used on the signature and endorsement lines. It is also used on the border of all business checks. Look for the MP logo next to the signature line.

Security Screen

Printed on the back of each check, text reading “Original Document” and listing security features will not photocopy clearly in order to prevent fraud.

Void Pantograph

A special printing technique that exposes the word VOID when the original document is scanned or photocopied.

Heat Sensitive Icon

Look for the hand symbol, this means the check features Thermochromic ink that reacts to heat. This makes it easier to spot as an authentic check.

Warning Box

Lists all security features with a description, so the issuer and recipient are aware of what is included.

Holographic Foil

Multi-dimensional foil seal stamped to check stock. Cannot be duplicated by inks, copiers or scanners.

Check Security Features

Built-in-paper security solutions

Invisible Fluorescent Fibers

Random fibers of various lengths and colors that are visible on both sides of the paper, which complicate copying. These special yellow fibers are only visible under ultraviolet light.

True Watermark

A subtly visible image that is part of the paper's internal structure. True in-paper watermarks are virtually impossible to reproduce. Hold the check up to the light and look for the watermark.

Toner Adhesion

An exclusive coating that securely bonds toner to paper making it nearly impossible to remove without causing visible damage.

UV Dull Paper

Low-reflective surface that enhances covert UV security features when viewed with a black (UV) light. Helps detect non-dull counterfeits.

Chemical Reactivity

Comprehensive protection against chemical alteration. Reactants change color when exposed to solvents, oxidants (bleach), acids and alkalis.

As a further safeguard, our business checks include a security warning, found next to the padlock icon. This tells would-be counterfeiters that the document contains safety features.

Unit Set Forms

A Unit Set Form is a multiple-part form that is carbon interleaved or carbonless. The parts are fastened on a common edge. Individual copies may be removed. Unit set forms are used typically for hand-written transactions and provide copies of the original document.

Edge Glued (No Stub)

Multiple-part form that is glued together. Information written on the first page will copy to remaining sheets.

Standard Sizes*

- 8½" x 11"
- 8½" x 14"
- 5½" x 8½"

Snap-Out Forms (Perforated Stub)

Multiple-part form that is connected with a stub. Information written on the first page will copy to remaining sheets. The stub portion is glued together and has a perforation allowing the sheets to be torn away.

Integrated Cards/Labels

Integrated card and label forms combine a form and label into a single, easy-to-print document that increases accuracy, improves efficiency and reduces human error. They can be used for a variety of purposes, such as packing slips, shipping orders, pick tickets and work orders to name a few.

Integrated Labels

The label is integrated into the sheet and peels out cleanly due to a label film on the back. The adhesive can be permanent or removable/repositionable.

Features

- Up to 5 colors (CMYK or PMS)
- Can have 1 or more cards on a sheet
- Card can be paper stock for writing and printing or laminated for printing on a desktop office printer
- Full and/or partial horizontal and vertical perforations

Freezer Grade Labels

The label has an adhesive that is specialized for cold conditions.
